Table of Contents

Introduction

Mafia World is a new simulation strategy, resource management game.

The story takes place in the Dark Web where gangsters rule modern day crypto businesses, laundering money through smart contracts, and hiring hackers instead of henchmen to do their dirty work. In Mafia World players choose businesses to earn money for their family. Mafia World businesses pay returns in the form of MobBucks. You can also earn MobBucks for referring others to your family and successfully completing certain tasks.

Choose a family, pledge your loyalty, and reach for the top in Mafia World!

Purpose

Social gaming played a huge role in the expansion of social media over the past couple of decades. Despite it's massive growth, one of the biggest setbacks of social gaming has been the lack of an easy to implement, and easy to understand, in-game currency. Players have also had trouble making in game purchases because of restrictions in certain countries.

Up until now online games have primarily relied on using "credits" which are typically purchased with credit cards. Game credits carry an inherent risk for loss, risk of fraud, and many other issues that can be resolved by implementing a blockchain payment system such as the TRON network.

Blockchain gaming provides a new way for social gaming to exist without the restrictions of a credit card based system. In addition, blockchain also offers security for the in-game currency by providing an immutable ledger.

You are buying Mafia tokens for the right to access and play the Mafia World game. After the crowdsale of Mafia Tokens; funding for further hosting and development will be generated through in-game purchases.

The utility of Mafia Token is for use in our blockchain gaming app.

MobBucks will only be distributed inside the Mafia World gaming app.

Why We Have Selected the TRON Network

Mafia World conducts its operation over the TRON blockchain, which further improves decentralization of the platform and leads to the democratization of contractual relationships in a token economy.

We believe TRON blockchain provides us with the best opportunity:

1) TRON is one of the largest blockchain networks in the world.
2) TRON is one of the most advanced blockchain networks today.
3) TRON offers democratized voting through use of it's SR System.

We also believe in TRON because the team makes a consistent effort to make new improvements and provide up to date developer resources.

Justin Sun (the leader of TRON) has proven to be a powerful force in the development of Blockchain and Finance who will help us reach our goals.

Some Stats About the TRON Network

Speed: 2000+ Transactions per Second (compared to 27 TPS for Bitcoin)
Users: 650k + 100m BitTorrent (one of the fastest growing blockchains)
Smart Contracts: Solidity (same as ETH with some added advantages)

Ease of Use: Access to DApps through TronWallet and TronLink.
Governance: ~200 Super Representatives that regulate the blockchain.

In addition the large user base built into TRON and BitTorrent provide a unique advantage that other blockchain platforms can't offer at this time.

BitTorrent Token will bring awareness to TRON that is unprecedented.

The **45 million+ daily active users of BitTorrent** will be able to prioritize downloads using token automated auctions. As a result BitTorrent will bring in hundreds of new transactions per second to TRON Blockchain.

We believe many of the BitTorrent Token holders who come to TRON will be interested in gaming which could lead to the expansion of our game.

Token Specifications

Mafia Token is a **TRC10 Token** on the TRON Blockchain.

We have chosen the TRC10 format over TRC20 due it's low usage of network bandwidth and 100% free transfers between wallet holders.

Mafia is available in crowdsale on the **mafiatoken.family** website where it can be purchased using TronLink using our **crowdsale smart contract**.

3,000,000 Mafia Tokens (30% of the 10 million supply):

Round	Amount	Ratio
1	1 Million Mafia at .01 TRX	100 to 1
2	1 Million Mafia at .05 TRX	20 to 1
3	1 Million Mafia at .1 TRX	10 to 1

We're dependent on raising funds in the token sale to cover costs associated with the development and maintenance of Mafia World.

We will begin development of the Mafia World game upon successfully completing our crowdsale and **selling all 3 Million crowdsale tokens**.

Token Distribution

✅ **10 Million Total Supply**
✅ **10 Million Circulating Supply**

2 Million reserved for Mafia Token founders.

3 Million reserved for Mafia airdrop campaign.

3 Million reserved for Mafia Token crowdsale.

2 Million reserved for Mafia World players.

Infrastructure

We will use development fund resources to assist in all application layers:

Storyline - Mafia is primarily a text based game requiring a rich storyline.

Graphics - Character / Environment design for the Mafia World game.

Smart Contracts - to facilitate transactions and pay mining rewards.

Mafia World will be a browser based simulation game. Players can interact with the Mafia World smart contract using TronLink extension for Chrome, or using TronLink enabled mobile applications such as TronWallet.me.

In Game Blockchain Business Tokens

Mafia World players will exchange 100 Mafia in return for being "made".

After being made players can purchase in game businesses in one of three lucrative industries: CBD, Sushi or Poker where they'll earn daily rewards.

Tsukiji Fish Market (Sushi) – The Mafia has moved beyond the old Fulton Fish Market into the streets of Japan's Tsukiji Fish Market. One of the largest fish markets in the world responsible for some of the best Sushi.

Macau Casino (Poker) – We all know the wise guys have their hand in gambling. What better business can you ask for than one that always tips the odds in your favor? With Poker the Mafia has moved into the lucrative new blockchain gambling industry. It's up to you to become a casino boss.

Medical Cannabis (CBD) – The medical cannabis industry is booming and Mafia World has captured a part of the action with 5 million CBD Tokens allocated to players willing to test their green thumb inside Mafia.

In addition to the in game business tokens we have created our own crypto for use inside Mafia World called **MobBucks** a TRC10 token.

MobBucks can be exchanged for TRX in our Mafia World exchange.

Players can also use MobBucks to purchase assets within Mafia World.

Assets players acquire will be displayed on their **Player Profile** page.

A few of the in game assets we have planned include:

Boat - Speedboat, Yacht, Superyacht

Car - Super Car, Luxury Car, SUV

Housing - City Apartment, High-rise Condo, Mega Mansion

SatoshiNakamoto - The TRON TRC10 version of Bitcoin.

These represent a few of our ideas; as development continues and we get closer to the launch of Mafia World, we will continue to add more assets.

Mafia Token Dividend Payments

Mafia World Leaderboard and Weekly Prize Pool

Players who attain a leaderboard position will earn MobBucks bonuses.

Mafia Token also provides rewards for token holders in the form of mining pool rewards paid to people with over 10,000 Mafia Tokens in their wallet.

In order to receive monthly rewards; token holders are required to lock their Mafia Tokens inside the Mafia World mining contract for 30+ days.

Boss: 1M+ Mafia = .01 MobBucks monthly per Mafia Token in holding.

Underboss: 500k-1M Mafia = .005 MobBucks monthly per Mafia Token

Consigliere: 100k Mafia = .0025 MobBucks monthly per Mafia Token.

Capo: 10k Mafia = .001 MobBucks monthly per Mafia Token.

The smart contract mining fund wallet address can be found at the bottom of the MafiaToken.Family site which links to tronscan.org. This wallet also holds the other tokens used in the Mafia World blockchain businesses:

🎩 **MAFIA TOKEN**

Mafia Token - TRC10 (Token ID: #1001861)

Token Vault: TH3rHMfmXthQYHMXpTrB17LXQAJDMq1uYE

Mafia Token Funding Allocation

We will use funds from our crowdsale to finance roadmap milestones:

I. The first milestone is to complete our browser based game Mafia World, this will require graphics work, coding, and copywriting for the storyline.

II. We will use project funds to pay for our websites and related expenses.

III. After our game is created we will use funds for promoting Mafia World.

By purchasing Mafia Token you are not guaranteed any future profits.

Mafia Token rewards are paid in return for storing Mafia Tokens in our mining smart contract, and are not the result of efforts from a 3rd party.

Any profits earned from Mafia World go to the project, team members, and founders to support future development of **Mafia Token** and **Mafia World**.

Mafia World is for entertainment purposes only.
